

VISIT QUESTIONNAIRE

We received a referral from your Physician for your appointment today at Western Washington Arthritis Clinic

Our *first* goal is to help patients receive a diagnosis, or to confirm the diagnosis that best fits their medical issues.

In order to provide this service to the greatest number of patients, we will generally act *as consultants only* for some patients. Many diagnoses such as Fibromyalgia or Hypermobility do not require ongoing rheumatologic care and will be referred back to your PCP or referring physician with our recommendations for treatment.

To accomplish these goals, if you choose to be seen at Western Washington Arthritis Clinic you will receive one new consultation visit and one follow up visit if any tests are performed. We will then provide written recommendations for your referring physician if that is where we feel treatment would best be rendered.

Please fill out the following pages *completely* to help us determine your care plan.
