

Advanced Practice Clinician (APC)

Location: [Everett](#)

Western Washington Cardiology is looking for a full-time Advanced Practice Clinician (APC), either ARNP or PA, with experience to work a flexible schedule (10 hour shifts), splitting time in the clinic setting and in the hospital setting. Our APC team is a three-provider team that works together for our patients and for our physicians. Coverage for weekends is expected, roughly one weekend every 2 months.

Job Summary:

Assists the doctor with everyday duties in running the hospital practice, patient rounding, cardiac stress testing supervisions, etc. Responsible for add-on office visits and Heart Failure Clinic patient visits in the outpatient setting.

Special Characteristics

Incumbent works under administrative direction, and in the hospital/ clinic setting under a doctor's supervision. Is not in charge of other employees.

Essential Functions (required by ADA)

- Split time in our Silver Lake outpatient clinic and inpatient at Providence Regional Medical Center.
- Consults on in/out patients
- Orders medications
- Dictates history
- Works directly with physician for care planning

Typical Work:

A) Hospital

Makes rounds on all patients undergoing invasive studies:

- Verifies patient's admission
- Dictates history and physical when necessary
- Facilitates communication between the cath lab and the floor
- Checks admitting laboratory values
- Notifies MD of any change in schedule
- Visits patient post-procedure
- Coordinates discharge planning

- Dictates discharge summary when necessary
- Writes pre- and post- procedural orders

Makes daily rounds on all inpatients:

- Checks daily status and adjusts patient management as per physician protocol
- Communicates with physician and notifies physician of change in patient status
- Checks daily laboratory values and makes appropriate adjustments in therapy
- Coordinates communication with referring physician
- Makes post discharge phone calls as necessary
- Intervenes in critical situations as instructed by physician.

Transfers and admissions:

- Assists in coordinating transfer of patients from other facilities
- Writes admitting orders
- Admitting history and physical

B) Office/ Clinic Setting

- Assists with history and physicals on new consults and follow-up for all patients, especially patients in our Heart Failure Clinic.
- Dictates reports as needed
- May oversee Coumadin adjustments for patients with anticoagulation
- Assists with patient management problems daily
- May perform occasional exercise stress testing or stress echocardiogram as needed

Typical Working Conditions

Typically works indoors, in either/both a hospital or clinic setting. Some weekend coverage is expected and days off will be adjusted accordingly.
