

**Position:** Echocardiographer

**Care Center:** Cardiology

**Responsibilities:**

The Echocardiographer (cardiac sonographer) is responsible for obtaining high quality recordings of ultrasound images of the heart and related structures for the cardiologist who will interpret the examination. This is a technical position requiring a highly skilled operator with knowledge of the various types of ultrasound procedures. Work situations require clinical interpretive knowledge, independent judgment, initiative, and ingenuity in performing procedures. External contacts include patients, family members, and physicians. Internal contacts are basically within the work group.

- Performs echocardiographic studies on adult patients
- Completes the echocardiography with quantitative calculations, measurements, and descriptive information acquired while performing the study on each patient
- Performs clerical procedures, to include scheduling, answering phones, filing, notification of interpreting cardiologists, preliminary report circulation, material stocking, data basing, and charging
- Performs cleaning and maintenance of ultrasound and other equipment
- Maintains reliable attendance
- Contributes to the success of the organization by continuously learning, and by performing other duties as needed or assigned

**Licensure / Certification / Registration:**

- Current BLS certification, preferred (can help obtain upon hire)
- Registered or registry eligible with the American Registry of Diagnostic Medical Sonographers with a specialty Registration of Diagnostic Cardiac Sonographers (RDCS). If RDCS registry eligible, must receive RDCS certification within 12 months of hire.
- Registered with Cardiovascular Credentialing International as Registered Cardiac Sonographer (RCS) or Registered Cardiovascular Invasive Specialist (RCIS) may be substituted for RDCS with the expectation of obtaining ARDMS registry within 12 months of hire.
- Previous experience as an Echocardiographer preferred

**Job Type:** FTE Negotiable
